

LOW VELOCITY DITCH CHECK

PRE-ASSEMBLED CHECK DAM

Includes:

- Low Velocity Ditch Check with attached front water seal and rear scour guard
- 3 compression stakes
- 16 sod staples

Structural Integrity – Stormwater Release – Sediment Retention

- Designed as a temporary barrier to slow the velocity of channel stormwater
- Resists undermining associated with traditional wattles used in this capacity
- Consists of:
 - A durable woven geotextile sleeve filled with kiln dried pine chips
 - An underlying attached front water seal and rear scour guard to prevent undermining
 - Compression stakes and sod staples to maintain placement
- Preassembled to ensure quality control and ease as well as consistency of installation
- **More effective, lower cost, and less maintenance than traditional LOW VELOCITY rock check dams**
